

Cost Analysis

2026-07-13

Contents

1	Assumptions	1
2	Executive Summary	1
3	Breakdown by grades	10
3.1	3200115	10
3.2	6010120	14

1 Assumptions

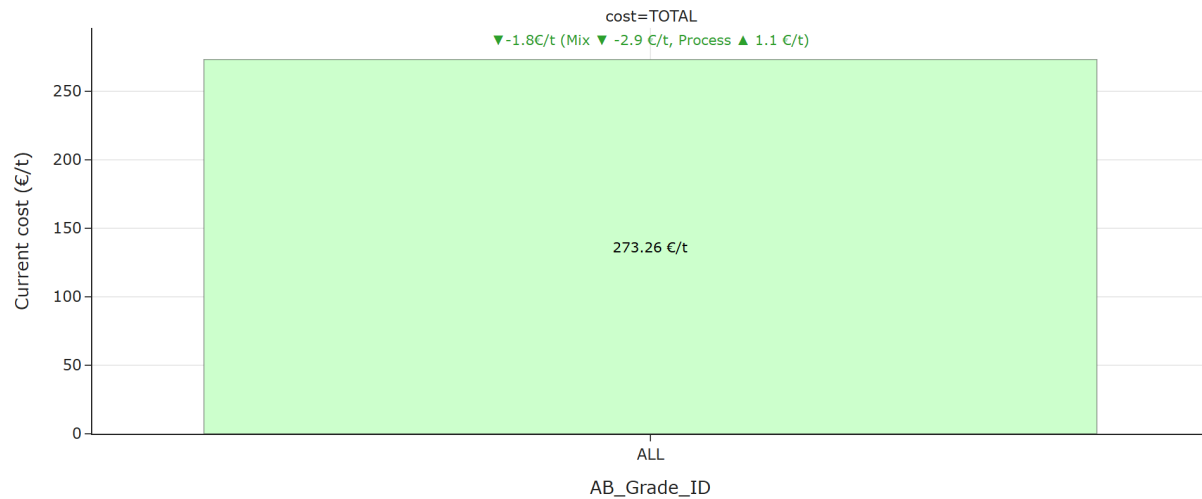

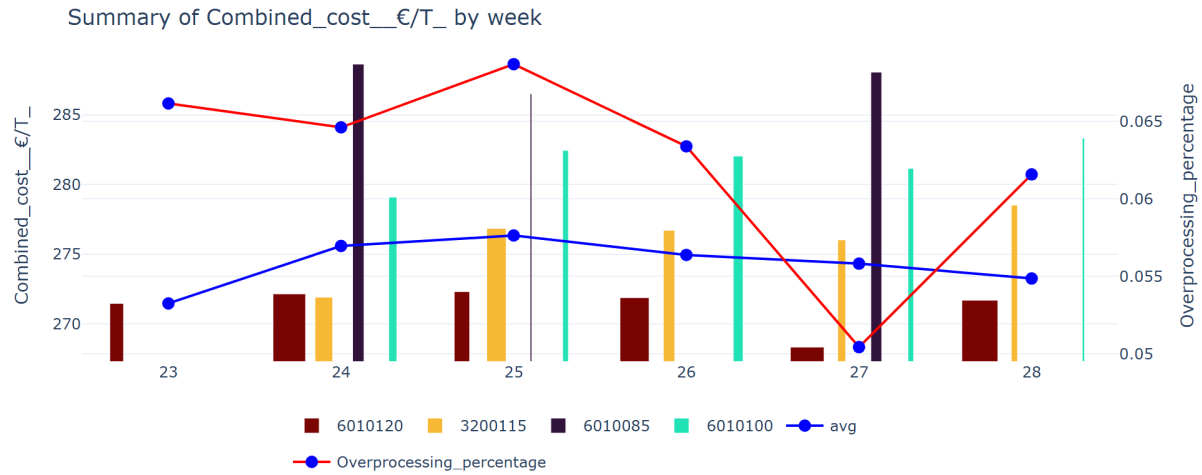

The aim of the analysis is to identify the most cost-effective production periods in months of data and recommend optimal operating windows for the corresponding key influencers that can be set as a benchmark for the weekly analysis.

- **Period Analyzed:** June 07, 2026 – July 13, 2026
- **Cost Components Included:** Fibre, steam, electricity, starch, and chemicals.
- **Grades Included:** Only grades 6010085, 6010100, 601020 and 3200115 are included in this week’s analysis.
- **Data Selection Criteria:** Only operating conditions where strength properties exceed specification thresholds were considered.
- **Naming Conventions Used:**
 - **Current:** Refers to the last week of the analyzed period.
 - **Historic:** Represents the average cost over the monthly interval previous to the “Current” period. Used as baseline.
 - **Best:** Corresponds to the cost associated with the optimal batch configuration.

2 Executive Summary

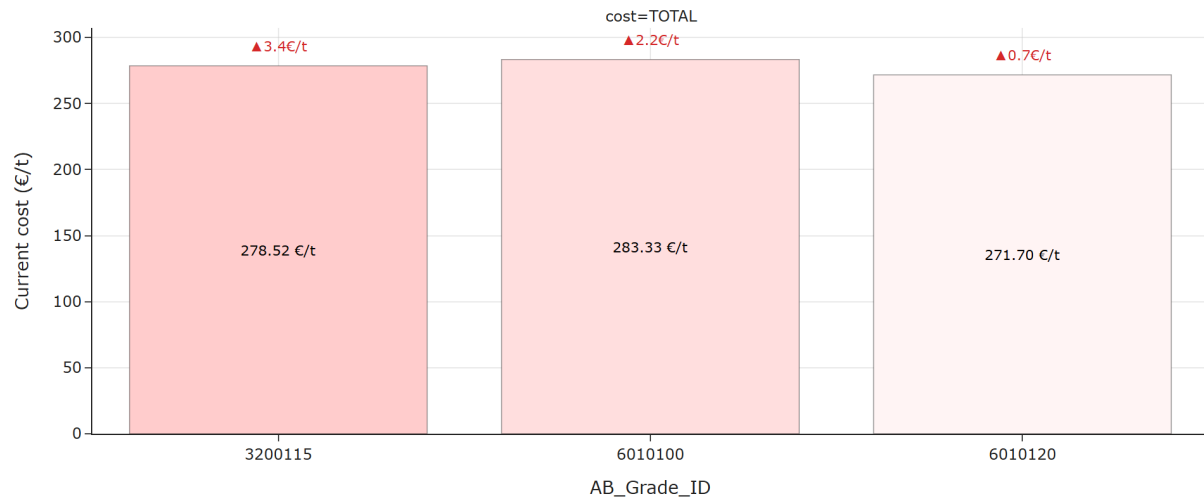

The following plot illustrates how total cost varies across different grades, enabling a comparison between the current configuration and the historical baseline.

The next plot displays how total cost evolves over time, with a breakdown by grade to show individual contributions.

For all considered grades, TOTAL cost saw a decrease of 1.77 €/t, resulting in 273.26 €/t.

Breaking down the overall cost change, -2.92 €/t was driven by a cheaper mix of grades, and +1.15 €/t was due to a deterioration in the process.

For grade 3200115, TOTAL cost saw an increase of 3.36 €/t, resulting in 278.52 €/t.

For grade 6010100, TOTAL cost saw an increase of 2.19 €/t, resulting in 283.33 €/t.

For grade 6010120, TOTAL cost saw an increase of 0.70 €/t, resulting in 271.70 €/t.

Looking across individual grades, the strongest cost increase was observed for grade 3200115 (+3.36 €/t). These movements stand out and may require further investigation.

Average change by component:

- **Electricity_€/T** increased on average (+1.50 €/t).
- **Starch_€/T** increased on average (+0.57 €/t).
- **Steam_€/T** decreased on average (-0.39 €/t).
- **Fibre_cost_€/T** increased on average (+0.31 €/t).
- **Chemicals_€/T** increased on average (+0.09 €/t).

A more detailed breakdown by component shows that the largest average increase comes from **Electricity_€/T** (+1.50 €/t on average), with the highest increase in grade 3200115 (+1.85 €/t) and the largest average decrease comes from **Steam_€/T** (-0.39 €/t on average), with the biggest drop in grade 6010120 (-1.90 €/t). These components stand out and may require further investigation.

Average change by steam:

- **Steam_Predryers** decreased on average (-0.95 €/t).
- **Steam_Afterdryers** increased on average (+0.49 €/t).
- **Steam_Heatexchangers** increased on average (+0.08 €/t).
- **Steam_Whitewater** decreased on average (-0.02 €/t).
- **Steam_Starchkitchen** decreased on average (-0.00 €/t).

A more detailed breakdown by component shows that the largest average increase comes from **Steam_Afterdryers** (+0.49 €/t on average), with the highest increase in grade 3200115 (+0.83 €/t) and the largest average decrease comes from **Steam_Predryers** (-0.95 €/t on average), with the biggest drop in grade 6010120 (-2.01 €/t). These components stand out and may require further investigation.

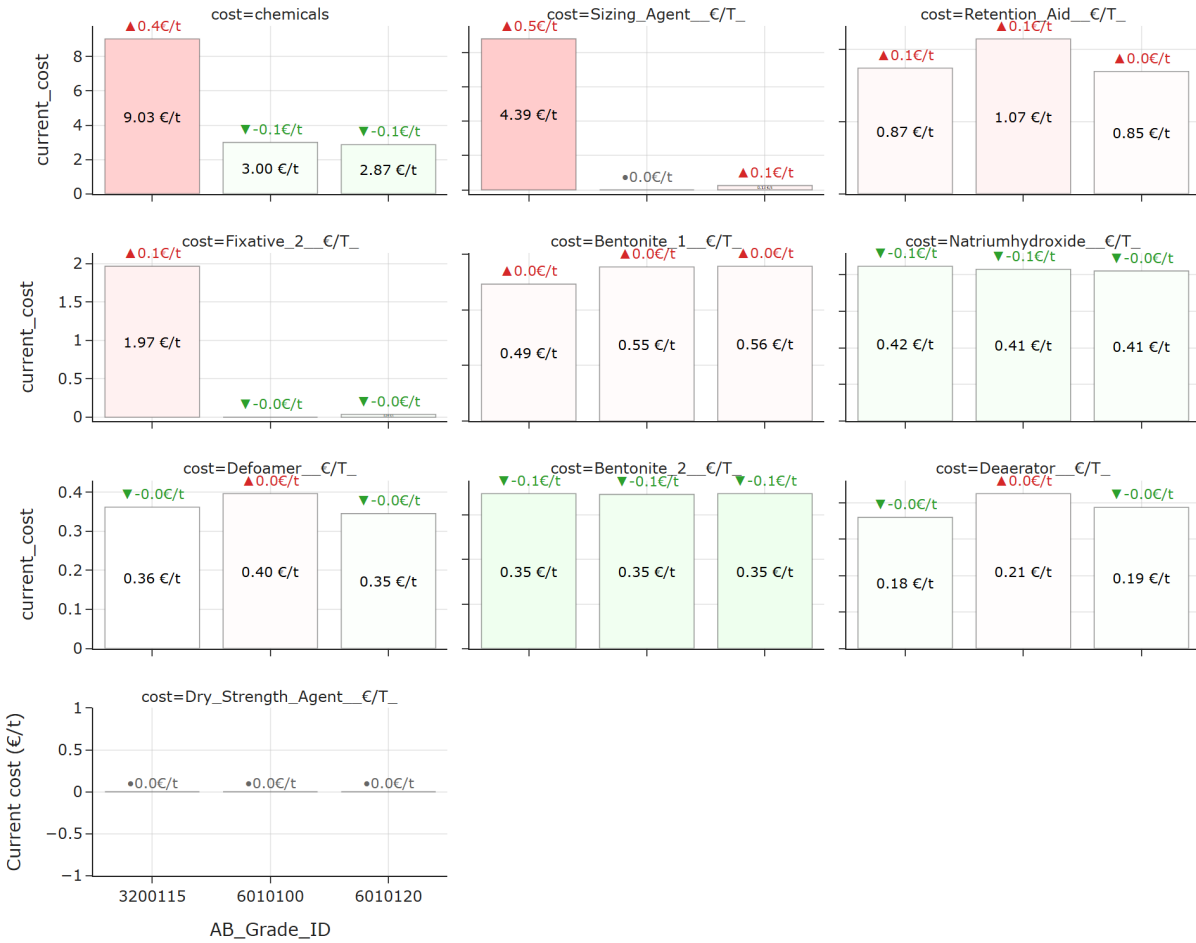

Average change by electricity:

- **Electricity_Other** increased on average (+0.96 €/t).
- **Electricity_Specific** increased on average (+0.55 €/t).
- **Electricity_Predryer** decreased on average (-0.05 €/t).
- **Electricity_Freqconverters** increased on average (+0.04 €/t).
- **Electricity_Wiresection** decreased on average (-0.02 €/t).
- **Electricity_Press_and_Steambox** increased on average (+0.01 €/t).
- **Electricity_Afterdryer** increased on average (+0.01 €/t).

A more detailed breakdown by component shows that the largest average increase comes from **Electricity_Other** (+0.96 €/t on average), with the highest increase in grade 3200115 (+1.21 €/t) and the largest average decrease comes from **Electricity_Predryer** (-0.05 €/t on average),

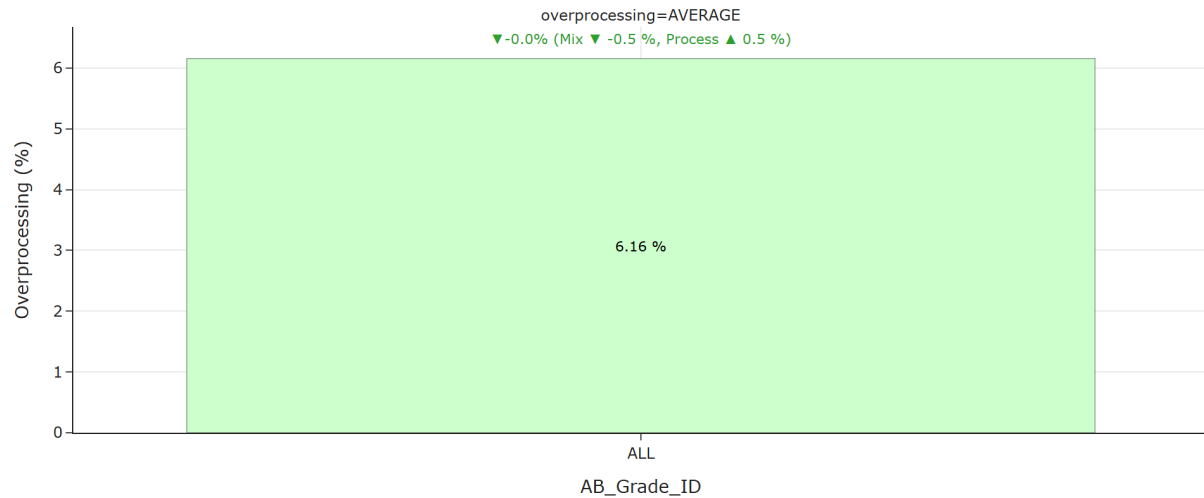

with the biggest drop in grade 6010100 (-0.05 €/t). These components stand out and may require further investigation.

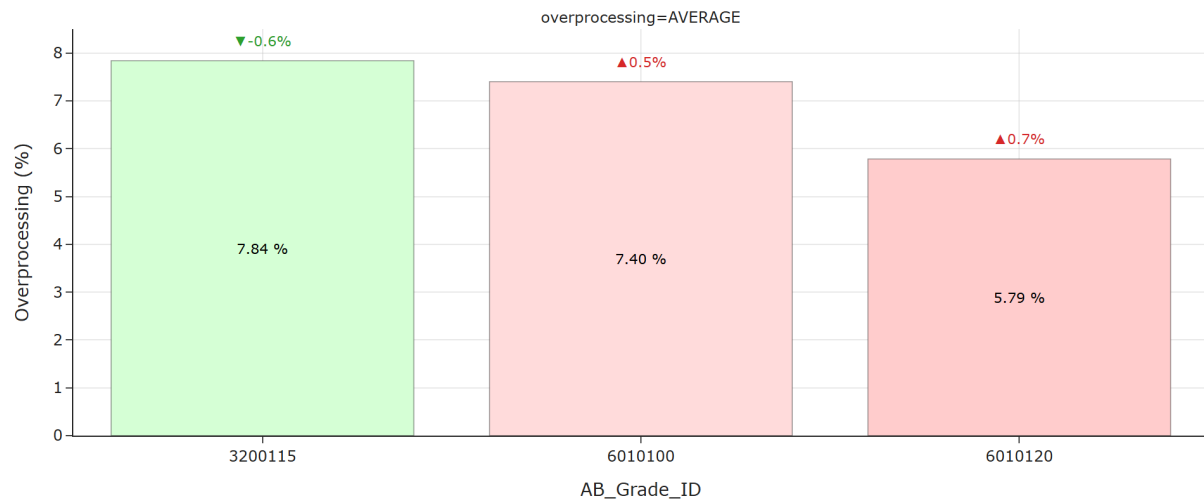

Average change by chemicals:

- **Sizing_Agent_€/T** increased on average (+0.28 €/t).
- **Bentonite_2_€/T** decreased on average (-0.14 €/t).
- **Retention_Aid_€/T** increased on average (+0.06 €/t).
- **Natriumhydroxide_€/T** decreased on average (-0.06 €/t).
- **Fixative_2_€/T** increased on average (+0.04 €/t).
- **Bentonite_1_€/T** increased on average (+0.04 €/t).
- **Deaerator_€/T** decreased on average (-0.01 €/t).
- **Defoamer_€/T** decreased on average (-0.00 €/t).

A more detailed breakdown by component shows that the largest average increase comes from **Sizing_Agent_€/T** (+0.28 €/t on average), with the highest increase in grade 3200115 (+0.46 €/t) and the largest average decrease comes from **Bentonite_2_€/T** (-0.14 €/t on average), with the biggest drop in grade 6010120 (-0.15 €/t). These components stand out and may require further investigation.

For all considered grades, TOTAL overprocessing saw a decrease of 0.01 %, resulting in 6.16 %.

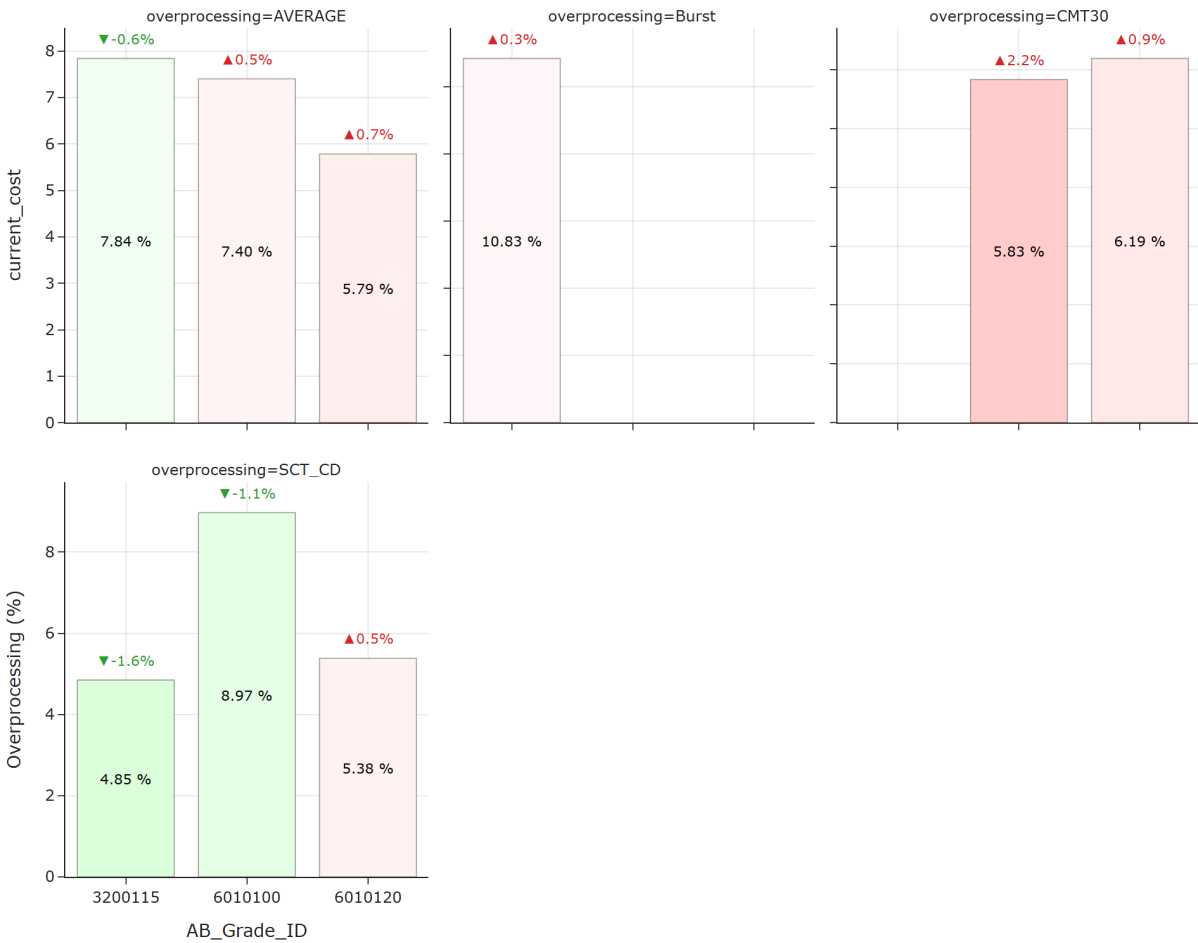

For grade 3200115, TOTAL overprocessing saw a decrease of 0.61 %, resulting in 7.84 %.

For grade 6010100, TOTAL overprocessing saw an increase of 0.53 %, resulting in 7.40 %.

For grade 6010120, TOTAL overprocessing saw an increase of 0.74 %, resulting in 5.79 %.

Looking across individual grades, the strongest overprocessing increase was observed for grade 6010120 (+0.74 %) and the strongest overprocessing decrease was observed for grade 3200115 (-0.61 %). These movements stand out and may require further investigation.

Average change by component:

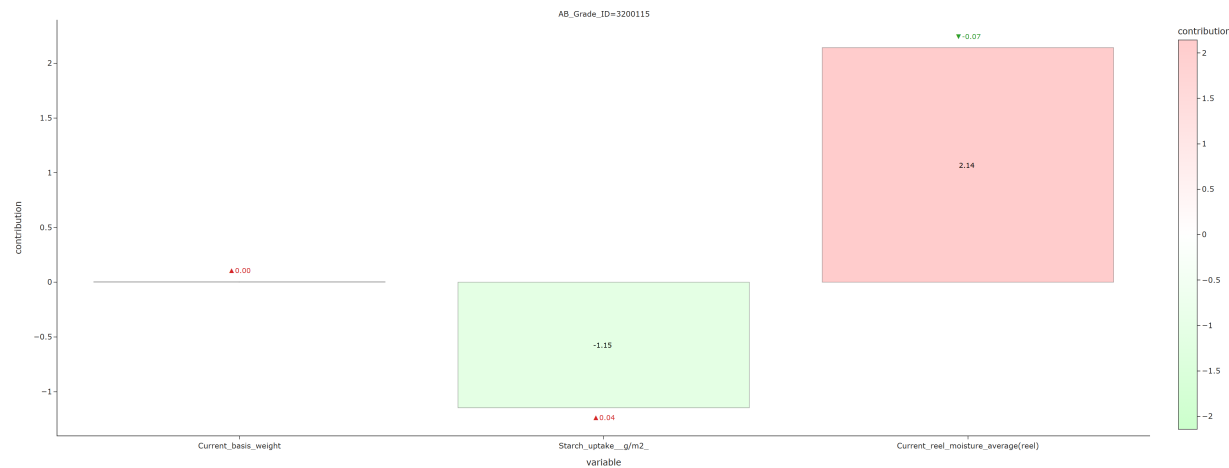

- **CMT30** increased on average (+1.56 %).
- **SCT_CD** decreased on average (-0.71 %).
- **Burst** increased on average (+0.34 %).

A more detailed breakdown by component shows that the largest average increase comes from **CMT30** (+1.56 % on average), with the highest increase in grade 6010100 (+2.18 %) and the largest average decrease comes from **SCT_CD** (-0.71 % on average), with the biggest drop in grade 3200115 (-1.55 %). These components stand out and may require further investigation.

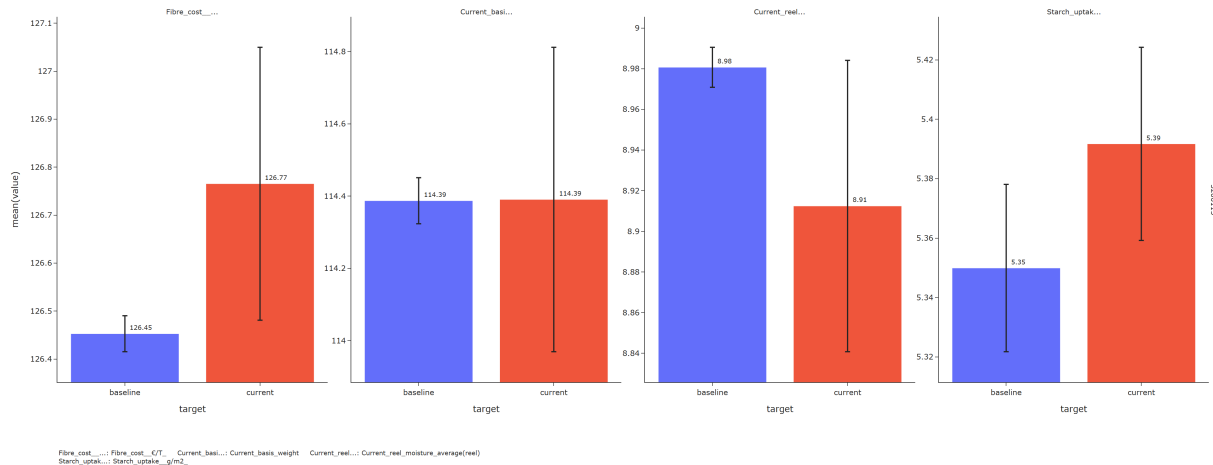

3 Breakdown by grades

3.1 3200115

3.1.1 Fiber cost

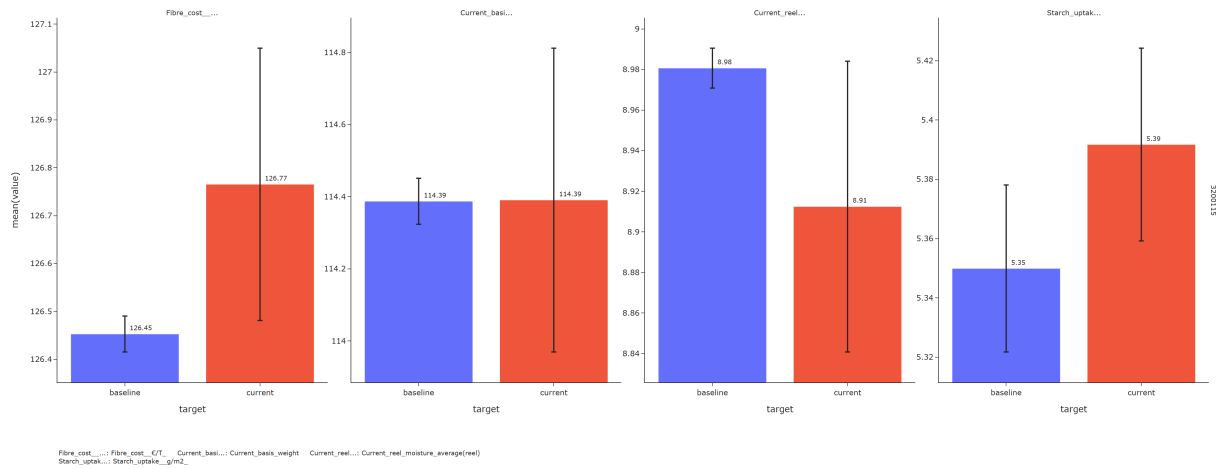

For grade 3200115, the cost change is mainly explained by the following factors (top 20% by contribution): **Cost-increasing drivers:** - Current reel moisture average(reel) decreased (-0.07)

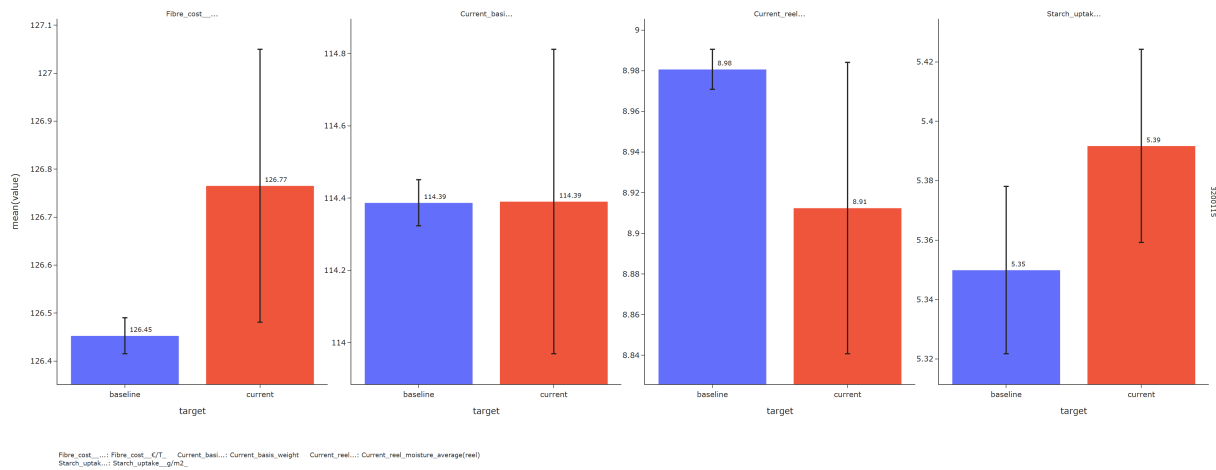

3.1.2 Steam cost

```
## KeyError: "[ 'Uhle_box_1_flow___l/min_', 'Uhle_box_2_flow___l/min_'] not in index"
```

For grade 3200115, the cost change is mainly explained by the following factors (top 20% by contribution): **Cost-increasing drivers:** - Current reel moisture average(reel) decreased (-0.07)

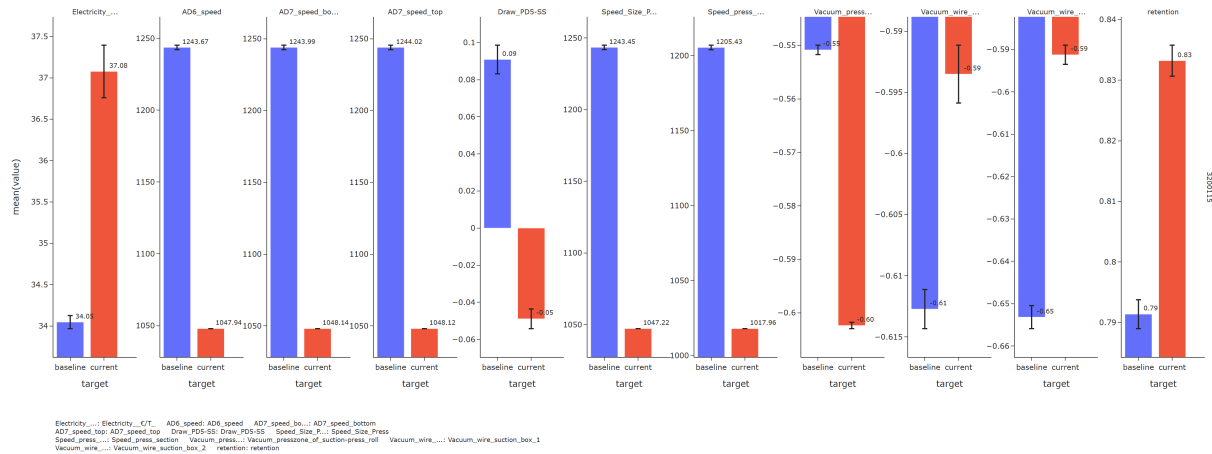

KeyError: "['Steam_€/T_'] not in index"

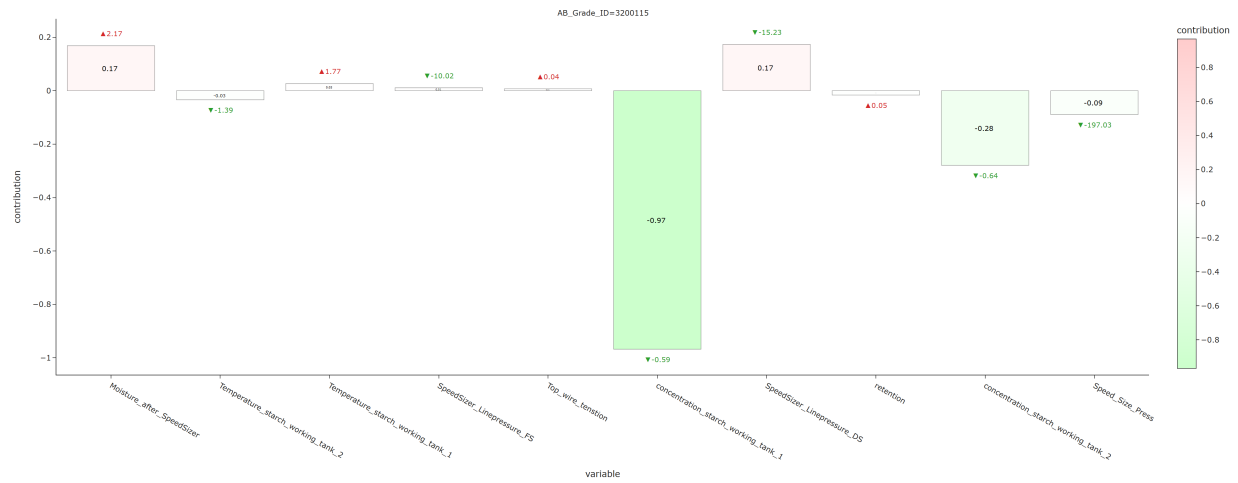

3.1.3 Electricity cost

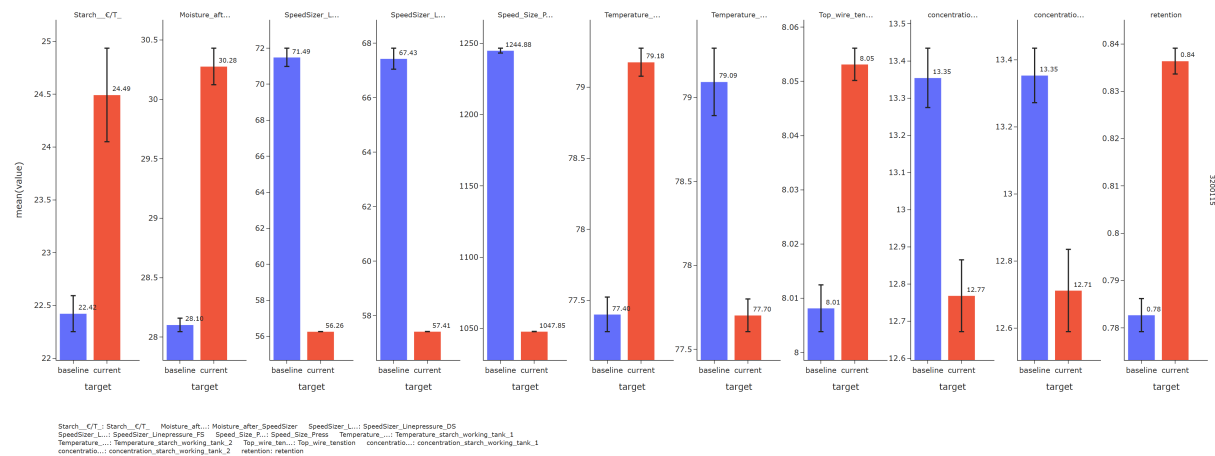

For grade 3200115, the cost change is mainly explained by the following factors (top 20% by contribution): **Cost-reducing drivers:** - Vacuum wire suction box 2 increased (+0.06) - Retention increased (+0.04) **Cost-increasing drivers:** - Vacuum presszone of suction-press roll decreased (-0.05) - Vacuum wire suction box 1 increased (+0.02) - Speed Size Press decreased (-196.23) - Draw PD5-SS decreased (-0.14)

3.1.4 Starch cost

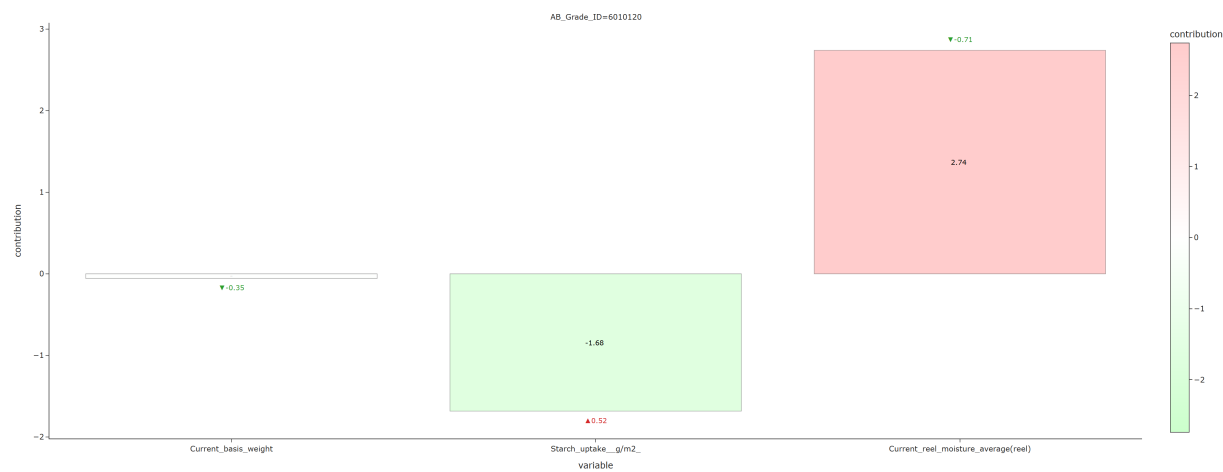

For grade 3200115, the cost change is mainly explained by the following factors (top 20% by contribution): **Cost-reducing drivers:** - Concentration starch working tank 1 decreased (-0.59)
- Concentration starch working tank 2 decreased (-0.64) **Cost-increasing drivers:** - SpeedSizer Linepressure DS decreased (-15.23)

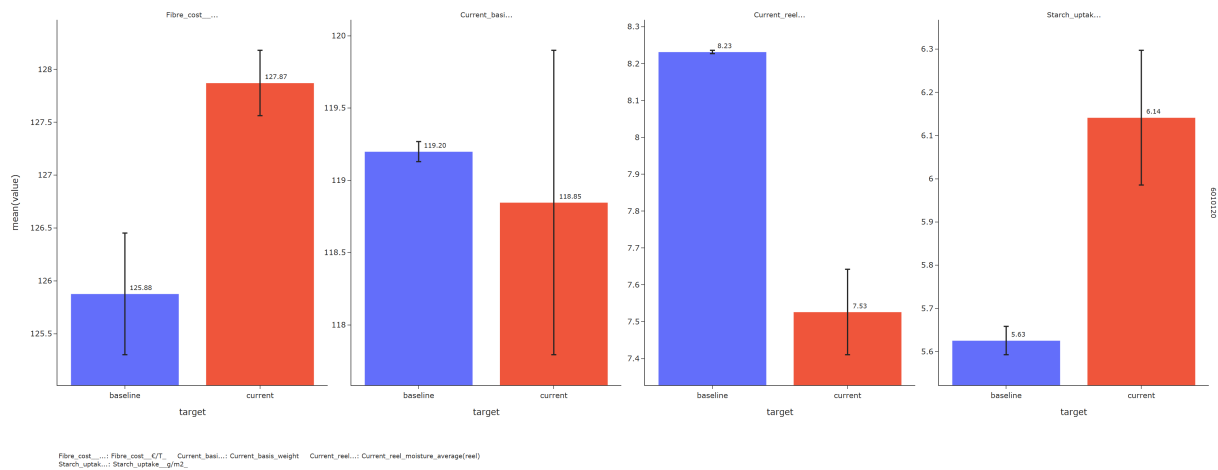

3.2 6010120

3.2.1 Fiber cost

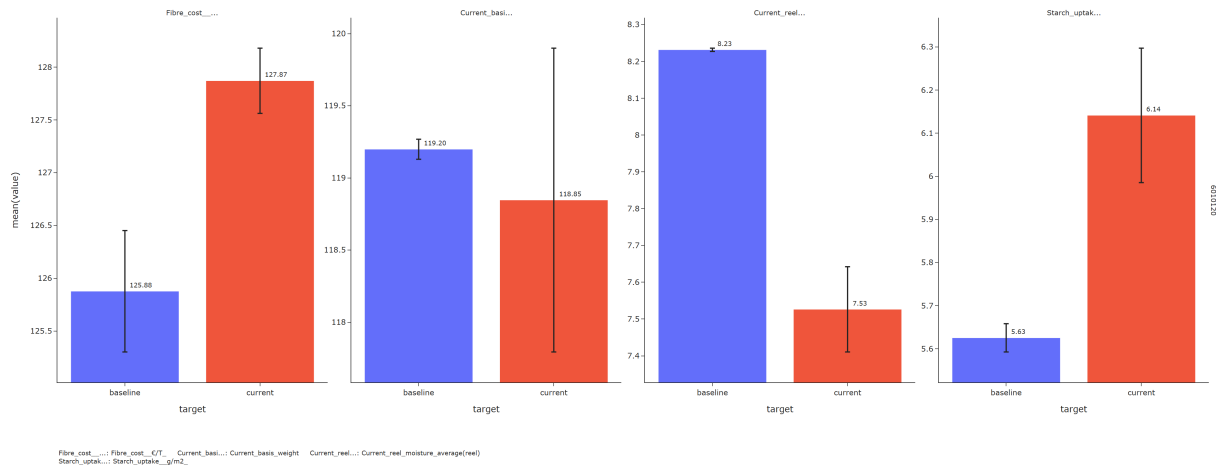

For grade 6010120, the cost change is mainly explained by the following factors (top 20% by contribution): **Cost-increasing drivers:** - Current reel moisture average(reel) decreased (-0.71)

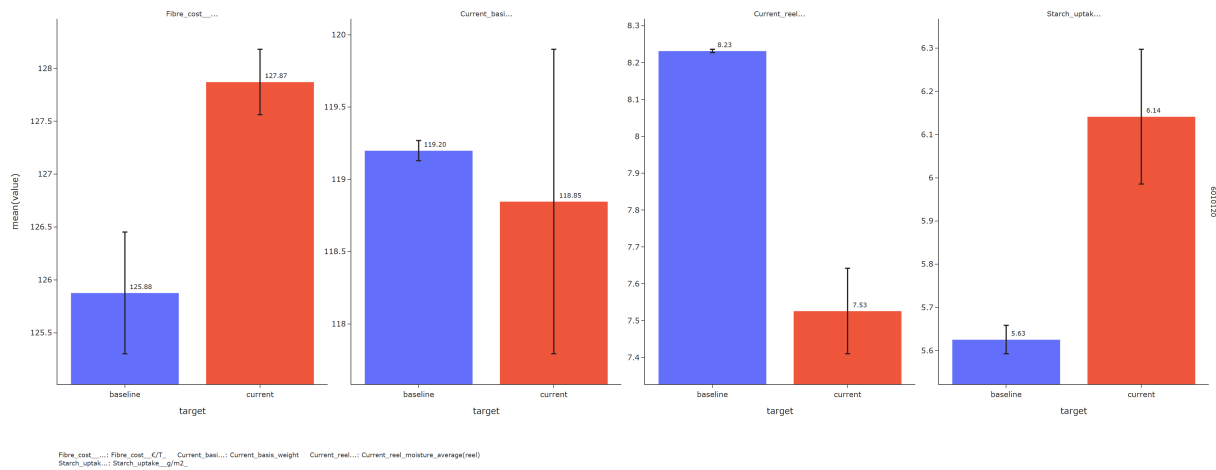

3.2.2 Steam cost

KeyError: "['Uhle_box_1_flow__l/min_', 'Uhle_box_2_flow__l/min_'] not in index"

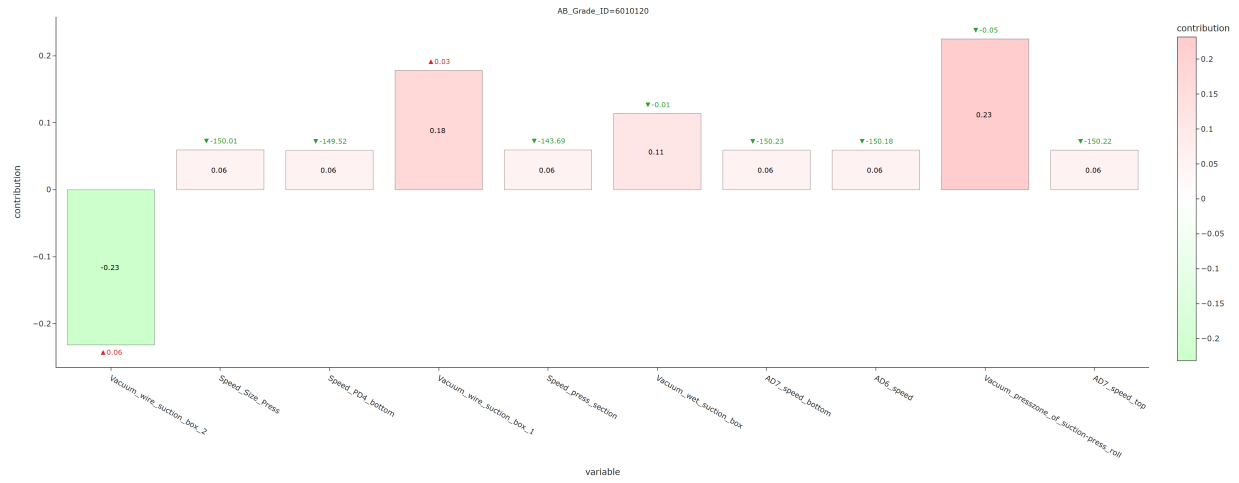

For grade 6010120, the cost change is mainly explained by the following factors (top 20% by contribution): **Cost-increasing drivers:** - Current reel moisture average(reel) decreased (-0.71)

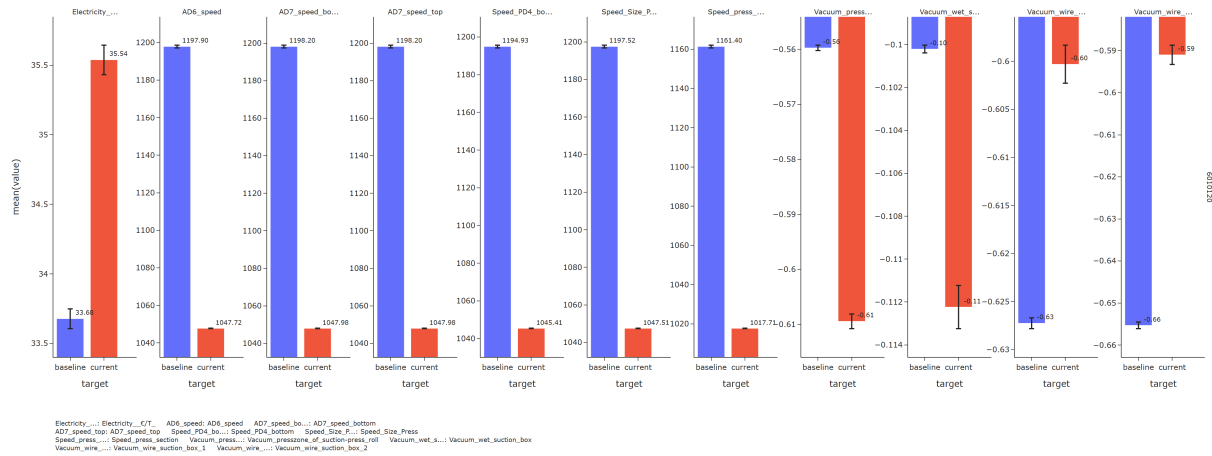

KeyError: "['Steam_€/T_'] not in index"

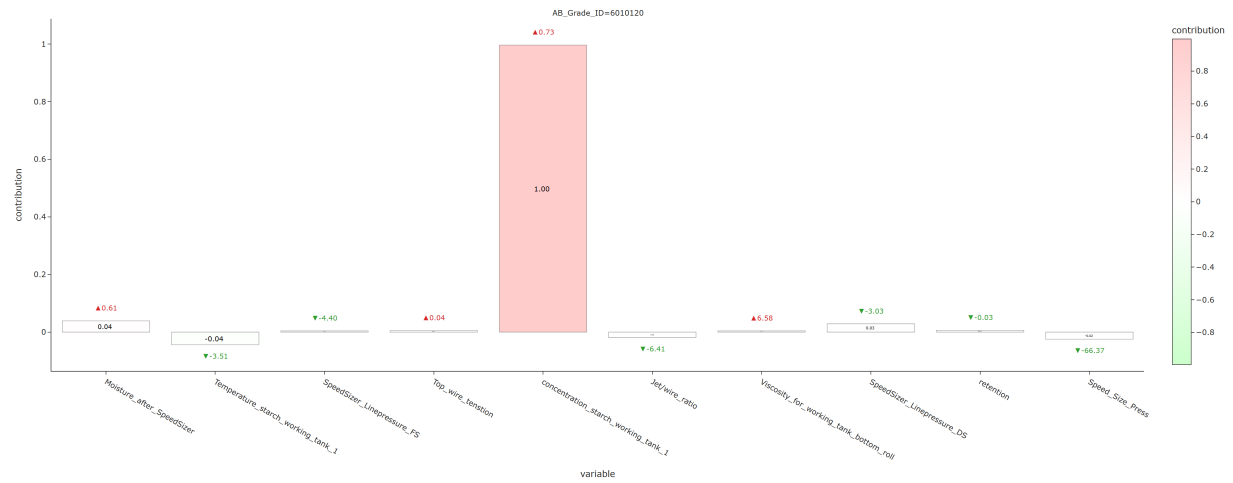

3.2.3 Electricity cost

For grade 6010120, the cost change is mainly explained by the following factors (top 20% by contribution): **Cost-reducing drivers:** - Vacuum wire suction box 2 increased (+0.06) **Cost-increasing drivers:** - Vacuum presszone of suction-press roll decreased (-0.05) - Vacuum wire suction box 1 increased (+0.03) - Vacuum wet suction box decreased (-0.01) - Speed Size Press decreased (-150.01)

3.2.4 Starch cost

For grade 6010120, the cost change is mainly explained by the following factors (top 20% by contribution): **Cost-reducing drivers:** - Temperature starch working tank 1 decreased (-3.51) **Cost-increasing drivers:** - Concentration starch working tank 1 increased (+0.73) - Moisture after SpeedSizer increased (+0.61)
